

### **Associate Director/Director, Manufacturing**

**Corporate Profile:** Hana Biosciences, Inc. (NASDAQ: HNAB) is a South San Francisco, CA-based biopharmaceutical company focused on acquiring, developing, and commercializing innovative products to advance cancer care. The company is committed to creating value by building a world-class team, accelerating the development of lead product candidates, expanding its pipeline by being the alliance partner of choice, and nurturing a unique company culture. Additional information on Hana Biosciences can be found at [www.hanabiosciences.com](http://www.hanabiosciences.com).

**Job Functions:** The Assoc. Director/Director, Manufacturing will be responsible for manufacturing and other CMC aspects of one or more of Hana's drug development programs. The position should provide small molecule API and drug product development expertise, including oversight and guidance of contract manufacturers, analytical labs, consultants, and other contractors as needed. The position will include preparation of IND/NDA CMC-related regulatory submissions and representation of the company before regulatory agencies, supervision of cGMP manufacture and release of drug product to meet all clinical trial and commercial needs as appropriate, and preparation/review of manufacturing batch records, specifications, stability studies, analytical method development and validation, manufacturing process validation, and other activities as required. This person will work closely with the Regulatory/QA function to assure that the CMC quality systems meet international regulatory compliance requirements. The individual must possess excellent communication, writing, and negotiation skills and the ability to work with project team members and development partners, while providing strategic CMC guidance to project teams in a dynamic environment.

**Qualifications:**

- Ph.D. degree in chemistry or closely related field
- 7+ years of experience in CMC development for small molecules in a variety of dosage forms, experience with cytotoxic drugs and/or liposome formulations highly preferred
- Thorough understanding of drug development and manufacturing, analytical chemistry, and international CMC-related guidelines and regulations
- Demonstrated teamwork and leadership ability in team settings
- Ability to travel to contract manufacturing sites worldwide
